

Eye-Pal Vision is the next generation of ABiSee's most popular device Eye-Pal Solo LV. Eye-Pal Vision reads aloud to you and magnifies printed material. With the best OCR accuracy, reading reliability and usability, "Vision" is a must-have device for convenient and independent reading.

An Easier Way to Read...

Eye-Pal Vision takes away the difficulty of reading fine print on pill bottles, cooking recipes and utility bills. It simply reads aloud to you. In addition, it can magnify reading material and display it on a monitor or home TV.

A Faster Way to Read...

Unlike the notoriously slow, old-fashion scanner, that usually takes about 30 seconds to convert a printed page into audio, Eye-Pal Vision does it in only 3 seconds.

A Simpler Way to Read...

There are three easy steps to follow.

No buttons to push. No training required. When you are finished reading, fold Eye-Pal Vision, place it in ABiSee's carrying case and take it with you.

A Better Way to Live...

Eye-Pal Vision's reliability, accuracy and ease of use will enable users to overcome challenges of everyday life and create opportunities to enhance their quality of life at work and at home.
