

Dolphin Guide

Rediscover your independence

Dolphin's range of Easy Access Solutions

Gain confidence with your personal computer guide

As the years roll on, the digital divide gets wider and society is in danger of leaving behind a generation of hard-working people that simply haven't been taught to use a computer.

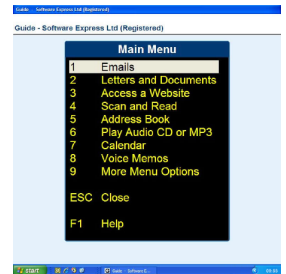

For most seniors, computers simply weren't available when they were younger. For others the sheer complexity of the modern computer leaves them confused, lost and even demoralized. Combine these problems with failing sight or even total sight loss and surfing the Internet seems a distant dream.

Trouble-free menus mean you'll never get lost!

Dolphin Guide is designed to take away all these fears and frustrations by offering a simple menu system that sits on top of Windows, letting you achieve all your computing goals. Receiving, reading and replying to an email is no problem as Dolphin Guide talks you through it, describing your options at every stage. Type a letter listening to Dolphin Guide announce every letter or word. Hear a "quack" and you'll know you've made a spelling mistake. With just two keys you can move up and down the Dolphin Guide menu and listen to your favorite options, including printing your newly drafted letter. Dolphin Guide can even offer you keyboard practice – you'll be surprised how good you get!

Dolphin Guide features clear and uncluttered screens which are designed to keep it simple. And, as the majority of the population don't see as well as they used to, Dolphin Guide allows you to magnify the screen and zoom in for the detail with absolute clarity. You can even improve contrast by changing the colors to ensure the screen is crystal clear specifically for you.

You CAN do it!

Still not confident that you can do it? Dolphin Guide has a reassuring voice that can read aloud everything that you do, at every stage giving you the confidence to progress and even try new things. You can even change the voice to the one you prefer, adjusting the speed to suit you. Plus if you get nervous or don't know what's next, simply hit the F1 key and the Dolphin Guide Help screen will describe what to do next.
