- Different color settings
- Longer battery life

- Tactile buttons
- Freeze function
- Folding handle
- Writing position
- Digital zoom

Looky+

The Looky is

A small, electronic handheld video magnifier developed by Rehan Electronics. Weighing only 7 ounces, it is the smallest and lightest device of its kind. It is so handy, you can carry it easily in your breast pocket.

Always a sharp image

With the Looky the picture is always sharp and you can read the text perfectly. You can see the text in color, but also switch to black/white, high contrast white/black or selectable colors, depending upon your preference.

Folding handle

The Looky comes complete with an ergonomically designed folding handle. This is designed to enable the user to hold the Looky in a comfortable way. Alternatively, you can fold it away using it placed flat on your reading material.

Special freeze function

The freeze frame function enables the user to push a button to freeze the text or picture on the LCD screen. It is as simple as taking a photograph. You can do this, for example, in the supermarket when you are not able to read the price of a product on the top shelf. Hold the Looky up in front of it, push the freeze button, and the image will be frozen on the screen.

Batteries

The Looky is provided with AA size rechargeable batteries. Changing batteries can be cumbersome for some. We have ensured that the batteries will only fit one way, so you can change the batteries in the Looky easily and quickly. Recharging the Looky is simple with the included charger. You can also use standard AA batteries.

A Handy Carrying Case

Rehan Electronics has designed the perfect carrying case for the Looky, which can be easily attached to your belt, hung around your neck, or fit easily into your bag.
